What is Emsculpt Neo®?

EMSCULPT NEO®: THE CUTTING EDGE OF BODY CONTOURING

Emsculpt Neo® is a non-invasive, FDA-approved, painless device that uses HIFEM (high intensity focused electromagnetic) energy paired with RF (radio frequency) to simultaneously emit both radio frequency and high-intensity electromagnetic energies that induce powerful muscle contractions. These contractions increase the rapid metabolic reaction in fat cells which in turn reduces those fat cells while simultaneously building muscle. In fact, Emsculpt Neo® causes 24,000 muscle contractions in just a single thirty-minute session without ever having to hit the gym.

So how does Emsculpt Neo® actually work?

The radio frequency heating allows the muscle temperature to quickly rise to prepare the muscles for exposure to stress, similar to a warm-up before a workout. In less than 4 minutes, the temperature in the subcutaneous fat reaches levels that apoptosis (destroy fat cells).

Meanwhile, the high-intensity focused electromagnetic energy causes supramaximal contractions which are not achievable at the gym or in any other way. This results in the growth of new muscle fibers and cells.

What makes someone a candidate for Emsculpt Neo®?

- You're not happy with your current figure.
- You are close to your goal weight but want to tone and tighten just a little more.
- You're experiencing excess fat in the abdominal area.
- You're looking to lift and tone your abs/buttocks/ arms/thighs/calves.
- You're more comfortable with non-invasive procedures.
- You want a quick, safe treatment with long-lasting results.

IVITAMIN PROPRIETARY IV DRIP BLENDS
